

We commit to understand your technical and commercial needs, supply innovative best in class performing products and optimize your process with our expertise, local service, care and attention.

As environmental consciousness grows in the minds of industrial decision makers, practical solutions and services are required to allow for environmental regulatory compliance, manufacturing material and process input cost savings as well as energy and waste handling cost savings.

Glenco Products offers practical solutions that make sense to all stakeholders in Nature and Industry. Our Solid/Liquid separation technologies allows us to meet the increasingly complex demands of our clients for engineered Solid/Liquid separation solutions. Our technologies allows industry to reclaim valuable process by-products and reduce the volume and costs of handling waste. Our storage and scrubbing technologies allow for safe protection of the environment from hazardous materials.

Our Partners

NOV Fiber Glass Systems regrouping **Ershigs** and **Belco**, is the pioneer and industry leader in Fiberglass Reinforced Plastics (FRP) composite construction for corrosive environments. Products manufactured by NOV include: thermoplastic lined FRP and unlined FRP equipment and tanks for above and below ground use, process vessels, stacks, chimney liners, scrubbers, piping systems, duct systems, dampers, manholes, oil/water separators and a vast scope of additional products.

Territory serviced by Glenco: QC, NB, NS, PE & NL

**Diemme
Filtration**

A brand of
Aqseptence Group

Diemme Filtration is the leading specialist in Solid/Liquid separation for industrial processes. Our wide range of Filter Presses and Thickeners are designed to provide solutions to critical processes in many industries, especially in mining practices that demand maximum product dryness, water recovery and compliance with environmental regulations. Our wide range of products are used in: Mining & Metallurgical, Metal Finishing, Construction & Dredging, Chemical & Pharmaceutical and Power.

Territory serviced by Glenco: MB, ON, NB, NS, PE & NL

NASH

Gardner Denver NASH is the world-class Leader of Liquid Ring Vacuum Pumps and Compressors, RUNTECH Turbo Blowers, Dry-Pro Screw Type Vacuum Pumps, Steam Ejectors and Engineered Systems. We provide Vacuum System Optimization, New Pumps and Pump Repairs, Pump Exchange Program, On-site Inspections, OEM Parts and Warranty.

Territory serviced by Glenco: MB, ON, QC, NB, NS, PE & NL
